

Ryder offers you a proven portfolio of modular services to enhance all elements of your transportation network. We will work with you to understand your objectives, then review and evaluate your existing network to provide the optimum solution. Our logistics experts will then work with your team to implement your bespoke solution in the most efficient way.

"Ryder has successfully supported ArvinMeritor (Light Vehicle Systems) to reduce logistics costs year on year."

Jan Huijgens, LVS Supply Chain Manager
keeping ArvinMeritor moving

"Ryder's lead logistics concept with local highly skilled field operators has proven successful to initiate many cost saving programmes."

Manuel Formis, Logistics Manager Europe
keeping Honeywell Turbo Technologies moving

Description

Transportation Management offers a flexible portfolio of services for you to choose the ones you need:

Consulting and Network Design – From consultancy for short-term projects such as individual lane cost analysis through to complete network re-design.

Procurement Services – An end-to-end procurement service from bid process management and cost evaluation, to carrier selection and management.

Shipment Planning and Execution – Operational planning and execution of shipments, providing full visibility and exception management.

Freight Bill Audit and Payment – Audit of your freight invoices to ensure you pay only for the services you use and the volumes you ship.

Our Transportation Management service will allow you to:

- Deliver significant cost reductions.
- Concentrate on your core business.
- Improve delivery accuracy and reliability.

Why choose Ryder?

Global Span – We manage \$3 billion worth of freight (air, ocean and land) through product flows to more than 100 countries.

Expertise – Our team of logistics experts has a proven track record of implementing and running optimum solutions.

Partnership – Working in partnership with you to continually improve your logistics network.

Key customer benefits

Visibility – giving you control

- Visibility of your total supply chain, including freight spend, shipment profile and carrier performance for you to make the right decisions.
- A single point of contact to manage and control all your logistics service providers.
- Central coordination of your transportation activities from our European Transportation Management Centre in Düsseldorf.

Optimise efficiency – reducing your logistics costs

- Optimising modes used, shipment size and frequency to maximise efficiency.
- Tangible reductions in the number of special shipments through centralised management.
- Leveraging the Ryder freight buying power to reduce your cost base.
- Hands on local support from our experienced and highly skilled logistics engineers to drive and support your supply chain programmes.

Ryder can also help you with:

Distribution Management – Independent management of your distribution to maximise efficiency and minimise inventory.

Transport Planning – We can review your fleet and driver resource to maximise your fleet efficiency.
